

The Academy of Breastfeeding Medicine Presents...

The 11th Annual International Meeting

Current Controversies in Breastfeeding Medicine

The 11th Annual International Meeting: *Current Controversies in Breastfeeding Medicine* presented by The Academy of Breastfeeding Medicine will include world-class speakers providing cutting-edge research on current and critical issues in breastfeeding medicine today. Our speakers are among leaders of research and clinical medicine in the world of breastfeeding and human lactation.

The ABM annual meeting focuses on the most authoritative and up-to-date clinical information on breastfeeding, spanning both maternal and child health issues. A significant educational opportunity, the 2006 International ABM Meeting is an ideal context for physicians to continue their professional education in a highly respected stimulating environment, while earning continuing medical education credits. Participating physicians will have the opportunity to meet and share knowledge and experiences with other participants and speakers from around the world, in addition to attending the ABM committee meetings, poster and platform abstract presentations, a grand banquet, and other special events. **This year's meeting will feature the first annual Founder's Lecture, Breastfeeding Infant Growth: The New Standards, given by renowned physician, Cutberto Garza, MD, PhD.**

In addition to the main physician's meeting, a health team meeting for non-physician health professionals will be offered, featuring the same dynamic, influential experts in the field of breastfeeding medicine. Come participate in a top-notch program with the backdrop of one of the most beautiful natural wonders of the world, Niagara Falls.

Widespread Praise for the Annual ABM Meeting

“I attended for the first time last year and loved the meeting, and will be coming again this year.”

Alison Holmes, MD
*Pediatric Hospitalist
Concord Hospital
Dartmouth Medical School, New Hampshire*

“The academic program has always been excellent, the opportunity to network with the movers in this field—priceless.”

James G. Murphy, MD
*Naval Medical Center
San Diego, California*

“It helps physicians from developing countries. It was like a dream come true. The organization, hotel, and the Meeting itself were excellent.”

Roxana Saunero Nava, MD
La Paz, Bolivia

“Great presentation about zinc deficiency in infants. Most of this was new to me!”

Lisa Amir, MBBS, MMed, PhD, IBCLC
*The Royal Women's Hospital
Melbourne, Australia*

“The most helpful part of any ABM meeting is the sharing of expertise within the group, the informality and the energizing.”

Linda B. Deppe, DO
Loma Linda University, California

“For me as a physician, the ABM meeting has eclipsed all other “lactation” conferences in the U.S. The quality of the science keeps improving and contact with colleagues in the field keeps me motivated from year to year.”

Nancy G. Powers, MD, FABM
*Wesley Medical Center – Neonatology
Wichita, KS*

This New Peer-reviewed Medical Journal will Enable Physicians to Better Understand all the Complexities and Benefits of Breastfeeding

This new academic, peer-reviewed journal created by physicians dedicated to the advancement of breastfeeding worldwide provides a scientific forum on breastfeeding and human lactation. With the growing demand for the best evidence-based research advances, this interdisciplinary journal explores the immediate and long-term outcomes of breastfeeding. The Journal focuses on all medical aspects pertaining to breastfeeding and addresses the wide spectrum of research and clinical applications that impact upon the optimal care of mother and infant.

Breastfeeding Medicine publishes original scientific papers, reviews, and case studies on a wide spectrum of topics.

Current Controversies

Conference Objectives

At the conclusion of this course, participants should be able to:

- Describe the scientific basis for the WHO policy recommendation on the duration of exclusive breastfeeding
- Discuss the risk of lactation failure related to maternal body mass and the effects that surgical treatment may have on maternal nutritional requirements during breastfeeding
- Identify and discuss the ethical issues in human milk banking
- Identify the appropriate growth standards for use in tracking growth in the breastfed infant
- Discuss the issues of pacifier use and co-sleeping as they relate to SIDS prevention in the breastfed infant

POST-SESSION RESEARCH WORKSHOP: ORGANIZING A RESEARCH PROJECT

Friday, September 22
1:00 – 3:00pm

An opportunity to learn the fundamentals of designing and executing clinical research in human lactation and breastfeeding, including the basics required to submit a grant application for research support. Discussions will also take place regarding the development of a research case registry. Guidance with hypothesis generation, aims and objectives, developing the methodology and selecting the subjects will be provided. Workshop leaders Drs. Carol Wagner and Cynthia R. Howard are accomplished researchers with long records of publications and funding.
