The 12th Annual International Meeting

Frontiers in Breastfeeding Medicine

The 12th Annual International Meeting: Frontiers in Breastfeeding Medicine, presented by the Academy of Breastfeeding Medicine, will include world-class speakers providing cutting-edge research and clinical information on current issues in breastfeeding medicine today. Our speakers are among leaders of research and clinical medicine in the world of breastfeeding and human lactation.

The ABM annual meeting focuses on the most authoritative and up-to-date clinical information on breastfeeding, spanning both maternal and child health issues. A significant educational opportunity, the 2007 International ABM Meeting is an ideal context for physicians to continue their professional education in a highly respected stimulating environment, while earning continuing medical education credits. This year’s meeting will also include the one-day pre-meeting course, “What Every Physician Needs To Know About Breastfeeding.”

Participating physicians will have the opportunity to meet and share knowledge and experiences with other participants and speakers from around the world, in addition to attending the ABM committee meetings, poster and platform abstract presentations, a western-themed banquet, and other special events.

This year’s meeting will feature the Second Annual Founders’ Lecture, “The Immune System in Human Milk and the Developing Infant,” presented by renowned physician, Armond Goldman, MD.

In addition to the main physician’s meeting, a health team meeting for non-physician health professionals will be offered featuring dynamic, influential experts in the field of breastfeeding medicine.

A culminating event will be a closing gala reception at the Amon Carter Museum for all conference participants and invited healthcare leaders.

This Peer-Reviewed Medical Journal will Enable Physicians to Better Understand all the Complexities and Benefits of Breastfeeding

“...This Peer-Reviewed Medical Journal will Enable Physicians to Better Understand all the Complexities and Benefits of Breastfeeding...”

“...When you attend the ABM Annual Conference, you have the opportunity to hear and interact with many of the “big names” in Breastfeeding Medicine — it is an energizing experience!...”

“...The Annual Meeting is a great opportunity to network with other physicians who hold a passion to support breastfeeding through education and research...”

“...Last year was the second ABM conference I attended. It was a wonderful meeting for its educational offerings, but also provided a valuable opportunity to network with colleagues with similar research and advocacy interests in breastfeeding...”

This Peer-Reviewed Medical Journal will Enable Physicians to Better Understand all the Complexities and Benefits of Breastfeeding

“This new academic, peer-reviewed journal created by physicians, dedicated to the advancement of breastfeeding worldwide, provides a scientific forum on breastfeeding and human lactation. With the growing demand for the best evidence-based research advances, this interdisciplinary journal explores the immediate and long-term outcomes of breastfeeding. The Journal focuses on all medical aspects pertaining to breastfeeding and addresses the wide spectrum of research and clinical applications that impact upon the optimal care of mother and infant.

Breastfeeding Medicine publishes original scientific papers, reviews, and case studies on a wide spectrum of topics.
